

## Lesson 2.

Classification of poisons. Classification of poisonings. Physic-chemical characteristics of xenobiotics. Theories of toxicity. Stages of acute poisoning.

1. Write the definition of **Poison**.
2. Write a **chemical classification** of poisons giving your examples
3. Write a **practical classification** of poisons, giving your examples
4. Write a classification of poisons **by selective toxicity**
5. Write a classification of poisons **by toxicity level**
6. Write a classification of poisons according to the **method of isolation**
7. Write the definition of **Intoxication (poisoning)**
8. Write down different types of classifications of poisonings. Give your examples
9. Toxicity theories
10. Targets for toxicants
11. Factors affecting toxicity
12. Periods of acute intoxication
