The thematic plan of independent work of a student in the discipline "General pharmaceutical chemistry" for students enrolled in the educational program in 2022 33.05.01 Pharmacy, profile Pharmacy (specialty),

the form of study is full-time for the 2024 – 2025 academic year

4 term 1. The development of global pharmaceutical chemistry¹. The period of iatrochemy. The period of the origin of the first chemical theories². The development of pharmaceutical chemistry in Russia¹. The origins of Russian pharmacy. The first chemical schools and the creation of new chemical theories in Russia². 2. Formation and development of the control and analytical service in Russia¹.². Research in the field of chemotherapy and chemistry of natural substances¹.². Control of independent work 5 term 3. Potentiometric titration. Amperometric titration¹. The essence of the methods. Advantages and disadvantages of methods². Control of independent work 6 term 4. Prevention of viral diseases¹. Pharmacopoeia analysis of antiviral vaccines (vaccines against influenza, coronavirus,	urs
1. The development of global pharmaceutical chemistry ¹ . The period of iatrochemy. The period of the origin of the first chemical theories ² . The development of pharmaceutical chemistry in Russia ¹ . The origins of Russian pharmacy. The first chemical schools and the creation of new chemical theories in Russia ² . 2. Formation and development of the control and analytical service in Russia ^{1,2} . Research in the field of chemotherapy and chemistry of natural substances ^{1,2} . Control of independent work 5 term 3. Potentiometric titration. Amperometric titration ¹ . The essence of the methods. Advantages and disadvantages of methods ² . Control of independent work 6 term 4. Prevention of viral diseases ¹ . Pharmacopoeia analysis of	emic)
period of iatrochemy. The period of the origin of the first chemical theories². The development of pharmaceutical chemistry in Russia¹. The origins of Russian pharmacy. The first chemical schools and the creation of new chemical theories in Russia². 2. Formation and development of the control and analytical service in Russia¹.². Research in the field of chemotherapy and chemistry of natural substances¹.². Control of independent work 5 term 3. Potentiometric titration. Amperometric titration¹. The essence of the methods. Advantages and disadvantages of methods². Control of independent work 6 term 4. Prevention of viral diseases¹. Pharmacopoeia analysis of	
chemical theories ² . The development of pharmaceutical chemistry in Russia ¹ . The origins of Russian pharmacy. The first chemical schools and the creation of new chemical theories in Russia ² . 2. Formation and development of the control and analytical service in Russia ^{1,2} . Research in the field of chemotherapy and chemistry of natural substances ^{1,2} . Control of independent work 5 term 3. Potentiometric titration. Amperometric titration ¹ . The essence of the methods. Advantages and disadvantages of methods ² . Control of independent work 6 term 4. Prevention of viral diseases ¹ . Pharmacopoeia analysis of	1
