① furniture (elasticity = -3)

if you cut the price by 10% the quantity

you sell will increase by 30%.

calculation $3 \times 10\% \rightarrow 30\%$

② Brussels sprouts (elasticity = -0.5)

To increase consumption by 15% the price must fall by 30%.

calculation $\rightarrow \% \text{ change in quantity} \div 0.5 \rightarrow 30\%$
